DETAILED ACTION

Claim Objections

1. **Claims 1-14 and 16-20** are objected to because of the following informalities: In claim 1, line 2, change "two sinusoidal waves having a frequency that differs by a factor of two" to –two sinusoidal waves, wherein said two sinusoidal waves having frequencies that differs by a factor of two--. Appropriate correction is required.

Claim 5 are objected to because of the following informalities: In claim 5, lines 1-2, change "according to claim 2 4," to – according to claim 2,--. Appropriate correction is required.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-14 and 16-20 are rejected under 35 U.S.C. 101 because the claimed invention as a whole must accomplish a practical application. That is it must produce a "useful, concrete and tangible result." State Street, 149 F.3d at 1373, 47 USPQ2d at 1601-02. The purpose of this requirement is to limit patent protection to inventions that possess a certain level of "real world" value, as opposed to subject matter that represents nothing more than an idea or concept, or is simply a starting point for future investigation or research (Brenner v. Manson, 383 U.S. 519, 528-36, 148 USPQ 689, 693-96); In re Ziegler, 992, F.2d 1197, 1200-03, 26 USPQ2d 1600, 1603-06 (Fed. Cir. 1993)). Accordingly, a complete claim should contain some indication of the practical application for the claimed invention. In claim 1, lines 9-10 only requires "determining a

correction to the generated asymmetric waveform” and does not produce useful, concrete and tangible results. For example, correcting the generated asymmetric waveform.

Furthermore, a process that consists solely of the manipulation of an abstract idea is not concrete or tangible. See *In re Warmerdam*, 33 F.3d 1354, 1360, 31 USPQ2d 1754, 1759 (Fed. Cir. 1994). See also *Schrader*, 22 F.3d at 295, 30 USPQ2d at 1459.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 and 16-20 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted step is: how the asymmetric waveform is controlled?

Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted step is: how the asymmetric waveform is controlled?

Prior art

3. The prior art made record and not relied upon is considered pertinent to applicant's disclosure:

Art Unit: 2857

Eu ['388] discloses digital measurement of amplitude and phase of a sinusoidal signal and detection of load coil based on said measurement.

Tell et al. ['749] disclose method and apparatus for spectroscopic measurement of the concentration of a gas.
